Study Plan Folder Utilization Survey

Data Current as of 4/12/18

52 emails sent

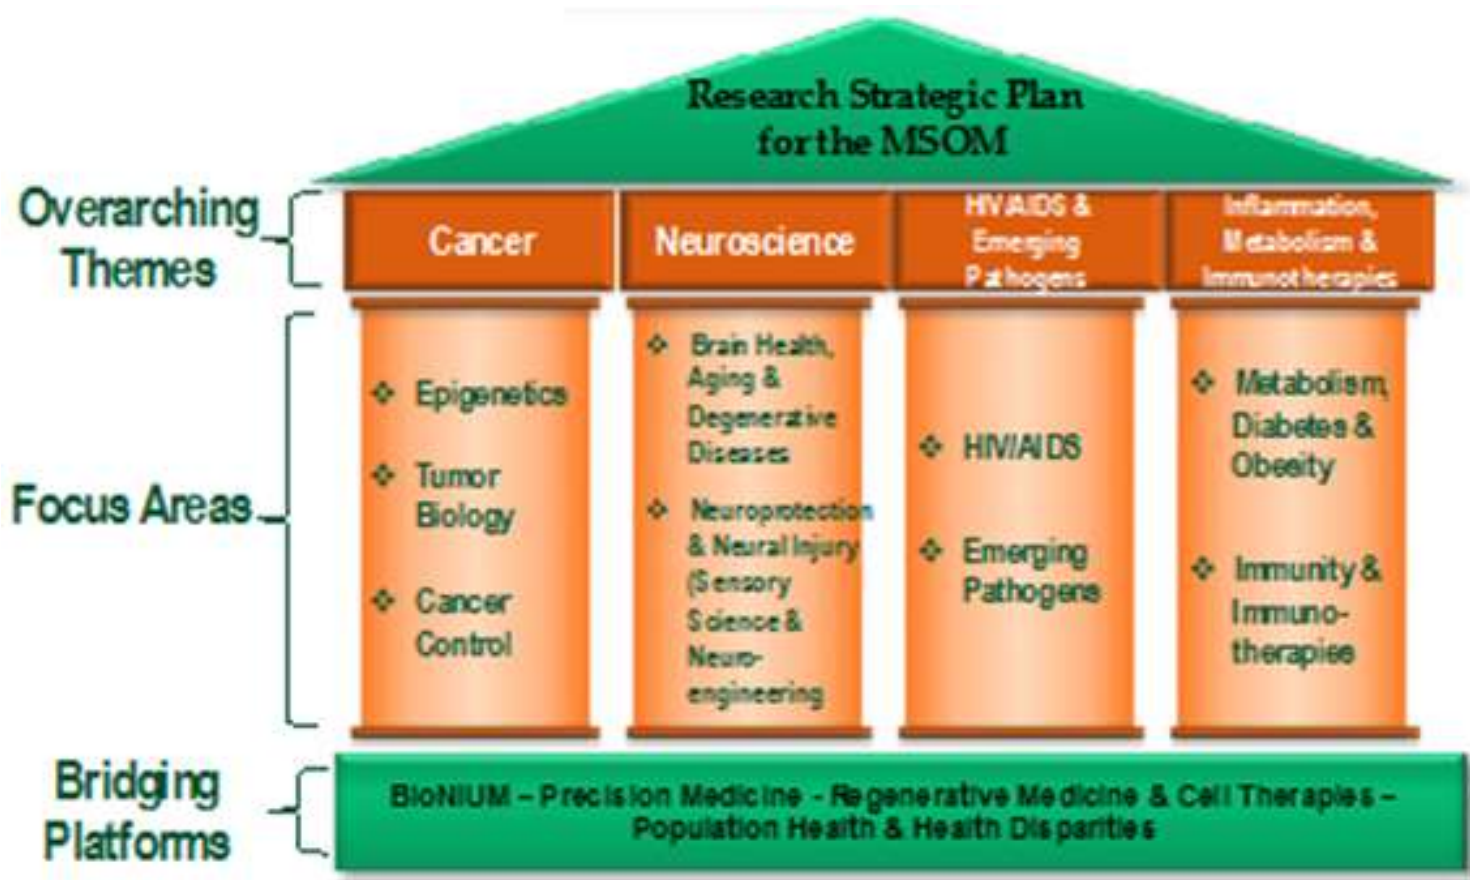

10 persons no longer at UM

42 possible survey respondents
20 surveys completed
52% of surveys completed

Research Strategic Plan for the MSOM

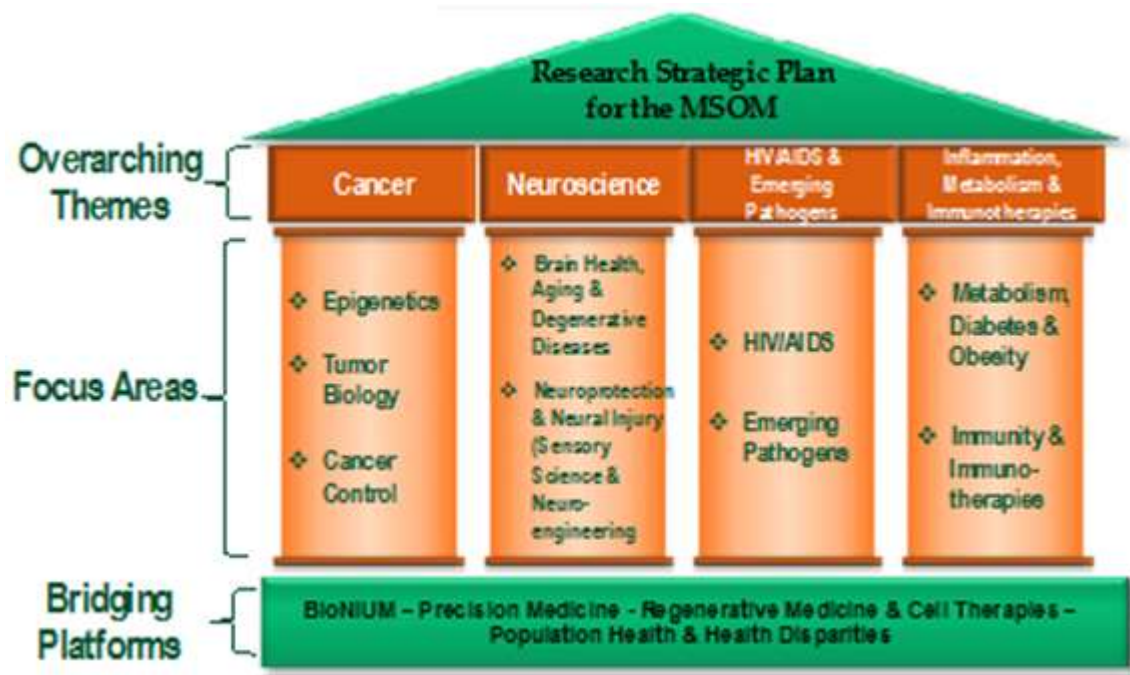

Q2 - The Study Plan Folder was primarily used for (select area of research):

Answer	%
HIV/AIDS & emerging pathogens research	0.00%
Inflammation, metabolism, & immunotherapies research	0.00%
neuroscience research	16.67%
oncology research	22.22%
Other (please indicate your research area):	61.11%
Total	100%

Note: Answer options = Research Strategic Plan MSOM

Q2 – The Study Plan Folders were primarily used for (Other Text):

- Head and Neck Injury
- Spinal Cord Injury
- Hepatology Research
- Ophthalmology
- Interstitial Lung Disease
- Rehabilitation Research
- Stem Cells
- Traumatic Brain Injury

Q3 – What type of information was distributed in the folder:

Consent document 40%

HIPAA form 6%

Study Visit Schedule 16 %

Study team contact information 13%

Other study documents 22%

Other relevant, non-study, documents
(e.g., info pamphlet on disease condition) 3%

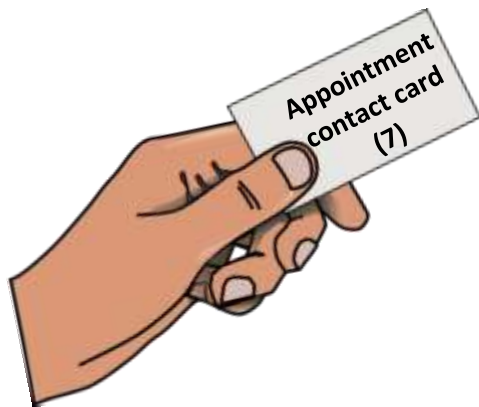

Q9 - What type of feedback (positive or negative) did you receive (please indicate feedback in box below):

- Help to keep study paperwork together and accessible for review
- They indicated that it helps them remember our study and to organize their files.
- When patients keep all the study documents in the folder, it's easier for them to find/identify the folder and bring it to their visits. Filled out logs/diaries are also usually kept in the folder.
- participants were very pleased having all study related documents in one folder. Many said very easy to find and remember because stand out from other folders.
- pts can keep their studies paper in the folder
- positive - helps to keep ICF copies organized
- Positive, helps keep things organized
- The folder helps keep all study related documents together

Data current as of 4/12/18

Q10 - Are there other tools that you think could engage the participant better (e.g., small, reusable tote for carrying study materials/meds; small, dry-erase calendar to jot-down study visits or dosing; study appointment reminder/contact cards, etc.) (please describe in box):

- Dry-erase mini calendar for drug dosing/study visits/appointment reminders
- Pill counters/containers
- Calculators
- Mobile app or Uhealth/MyUHealthChart driven study reminders
- Sheet protectors for sorting documents in prong-section of folder

(#) denotes number of times mentioned in survey response.
